10.17 District 17: The "Y"	<p>The Y is a congested area. We do not think there should be any high density construction approved, similar to what was recently discussed.</p> <p>In general the Comp Plan should assert that if an area is upgraded another area should be downgraded in regard to building/density. Without corresponding protection for scenic and wildlife habitat we will all too quickly lose what we value most in the area.</p> <p>We could end up with both sprawl in the county and congestion in town.</p>	Emily Ambler	5/1/2009 13:44
10.17 District 17: The "Y"	Please be sure that any "enhancements" to the Y keep pedestrian and biker safety as top priorities. Navigating these areas as a walker or biker is exceedingly dangerous.	Robin McGee	5/12/2009 11:29
10.17 District 17: The "Y"	<p>Transportation Theme should include a Roundabout at the Y to reduce congestion. A density increase is not appropriate unless congestion problems are solved.</p> <ul style="list-style-type: none"> <li>-Disagree that the Y is an appropriate location for significant increase in workforce housing. As a gateway it should transition to town.</li> <li>-The proposed hi potential density is twice what is currently built. This is not appropriate for an intersection that already has significant traffic problems.</li> </ul>	Save Historic Jackson Hole	5/15/2009 15:02
