

meeting principles

We are here to **illustrate** the vision, common values and policies in accordance with the approved Comprehensive Plan.

*The process will illustrate our common values at a **general level**; therefore, we do not need to agree on every detail.*

To meet the Comprehensive Plan's Growth Management Program, we will begin the **shift of development** from rural areas to appropriate locations with services.

*We are committed to a **defined process** with key outcomes.*

There are '**givens**' that we must work within, including existing entitlements.

meeting principles

Our aim is to **protect what we love** while ensuring change works for our community.

*The process will be based on **best available data**. The Comprehensive Plan is adaptive and will incorporate new data as it becomes available.*

This process is founded on **respect** for each other, nature, private property rights, present + future neighbors and the community as a whole.

Staff and consultants are simply **listening, facilitating, and elevating** the discussion.

*Success will require **individual commitment, compromise and creative solutions** to achieve the community we desire and protect the natural setting in which it sits.*
