

Illustration of Our Vision

Why Illustrate Our Vision?

Realizing our vision means proactively planning for what we want – rural open spaces and high quality complete neighborhoods – and identifying where we want them. Our Vision and Common Values describe how we will direct development toward suitable areas in order to preserve and protect the ecosystem and design development to enhance our quality of life. The Illustration of Our Vision identifies where those suitable areas are located.

As important as location, is the type of preservation or development desired. Unlike the past, a principle of growth management in this Plan is predictable implementation. By defining the desired character for each area of the community, all community members know what to expect as a result of preservation and development regulations and incentives. In areas suitable for development, the Illustration of Our Vision describes how we will protect the character we love while ensuring that the development contributes to the goals of the Comprehensive Plan. The Illustration of Our Vision also describes how we will preserve and enhance all other areas to provide wildlife habitat, wildlife connectivity, scenery, and open space.

The community is committed to continually adapting our implementation strategies to ensure preservation and development occurs in the desired amount, location, and type. This can only be realized if we define desired location and character for the preservation and development. Adapting our implementation also requires rigorous analysis of our successes and failures. The Illustration of Our Vision defines existing, baseline character in addition to desired future character; allowing implementation strategies to be adapted based on analysis rather than theory.

Our community's many districts share common values, but also have unique identities. While each of our community's policies is important to achieving our Vision, not all policies apply communitywide. Each individual preservation and development project should be a contributing piece in the communitywide plan for achieving our Vision. The Illustration of Our Vision is the communitywide picture of where we will place all the pieces – ensuring that all policies of this Plan are implemented in the context of our Vision and no policies are forgotten.

How is the Vision Illustrated?

The Character Districts that make up the Illustration of Our Vision place the policies of the community's three Common Values on the ground through levels of character classifications and definitions. At the highest level, the private lands of the community are divided into Character Districts – areas with common natural, visual, cultural, and physical attributes, shared values and social interaction. Each Character District is classified as either a Rural Area focused on

ecosystem stewardship; or a Complete Neighborhood focused on enhancement of community character. Within each Character District areas of Stability, Transition, Preservation and Conservation are identified based on the existing character of the specific area and the desired future character for the entire District. For each subarea, Character Defining Features specific to that are described textually and visually to ensure the desired character is achieved.

Complete Neighborhoods + Rural Areas

Character District boundaries are determined by layering the best available quantitative and qualitative data for each of the three Common Values (Ecosystem Stewardship, Managed Growth, Community Character) to identify areas of the community that share similar characteristics. This layering of data also describes the existing character of each District. Based on the presence of Complete Neighborhood and/or Rural Area characteristics each District is classified and issues and opportunities are identified.

Complete neighborhoods provide:

- Defined character and high-quality design
- Public utilities (water, sewer, and storm sewer)
- Quality public spaces
- A variety of housing types
- Schools, childcare, commercial, recreation, and other amenities within walking distance (1/4 to 1/2 mile) of residences
- Connection by complete streets that are safe for all modes of travel

Rural areas provide:

- Viable wildlife habitat and connections between wildlife habitat
- Natural scenic vistas
- Agricultural and undeveloped open space
- Abundance of landscape over built form
- Limited, detached single family residential development
- Minimal additional nonresidential development

Existing Complete Neighborhood + Rural Area Characteristics by Character District

	Defined character and high quality design	Public utilities (water, sewer)	Quality public space	Variety of housing types	Walkable schools, commercial, rec., etc.	Connection by complete streets	Viable wildlife habitat and connectivity	Natural scenic vistas	Agricultural and undeveloped open space	Abundance of landscape over built form	Limited, detached single family res. dev.	Minimal nonres. dev.

	Complete Neighborhood Elements						Rural Area Elements					

The Comprehensive Plan encourages development to occur in Complete Neighborhoods, rather than in the sensitive areas in the Rural County. Complete Neighborhoods consist of less than 5% of the 76,000 acres of private land in the community.

Areas of Stability, Transition, Preservation + Conservation

Each Character District is divided into areas of Stability, Transition, Preservation or Conservation. The areas appropriate for people to live, work and play are the areas of stability and transition. Those areas where we will focus on ecosystem stewardship are the areas of preservation and conservation. These areas and their classifications are determined based on the existing character of the area in relationship to the desired future character for the District in which the area is located.

Complete Neighborhood Areas of Stability

- Areas in which no change to the existing character is necessary
- Development will be infill that maintains the existing identity or vitality
- Area may benefit from strategic infill or development of non-existing Complete Neighborhood amenities

Complete Neighborhood Areas of Transition

- Areas where most of the community would agree that development/ redevelopment or a change in character would be beneficial
- Areas that would benefit from reinvestment and revitalization
- Goals for development include improving access to jobs, housing and services and reducing reliance on single-occupancy trips

Rural Areas of Preservation

- Areas in which no change to the existing undeveloped character of the scenic resources and wildlife habitat is necessary
- Additional amenities and infrastructure are inappropriate
- May benefit from some clustered residential development that improves the overall preservation of open space

Rural Neighborhoods with Conservation Opportunities

- Areas of existing development and platted neighborhoods with high wildlife values, where development/ redevelopment should focus on improved conservation
- Areas that benefit from an increase in open space, scenic resources, and habitat enhancement
- Goals include balancing existing development with improved wildlife permeability and scenic enhancements.

Character Defining Features

Character Defining Features are identified for each Character District as a whole as well as each specific subarea within the Districts. The character defining features for the District as a whole include identification of the appropriate types of development in the range land use patterns that exist in the community. Each type begins to identify the appropriate pattern and intensity of the desired development in the District, however the specifics of desired character are described through text, photos, and drawings for each subarea that illustrate and emphasize the most important aspects of the character to be preserved or achieved in that particular area.

	Preservation	Agriculture	Clustering	Habitat/Scenic
Size	n/a	70+	± 160	35
Height	n/a	n/a	2 story	2 story
Use	Preservation	Residential, Conservation	Residential, Conservation	Residential, Conservation
Special Considerations	Preserved open space, wildlife habitat	Barns biggest structures, agricultural exemptions + incentives	Better wildlife/scenic protection than 1 per 35	Design for wildlife and/or scenery, limit house size

Conservation	Residential	Village	Mixed Use	Town	Resort/Civic
1-5	± 1	n/a	n/a	n/a	n/a
2 story	2 story	2-3 story	2-3 story	2-3 story	n/a
Residential	Residential	Residential, Local Convenience Commercial, Civic	Residential, Commercial, Industrial, Civic	Residential, Commercial, Civic	Resort, Civic
Design for wildlife and/or scenery, limit house size	Design for wildlife and/or scenery, limit house size	Variety of housing types, complete streets, workforce housing	Mixed use, pedestrian oriented, workforce housing, complete streets	Pedestrian oriented, public spaces, complete streets, employment center, workforce housing	Master Planned, more intense development

What Does the Illustration of the Vision Address?

The community's Vision is illustrated through 15 Character Districts. A character district is an area with common natural, visual, cultural, and physical attributes, shared values and social interaction. Although we are one community, each Character District has unique issues and opportunities in Achieving Our Vision and therefore different objectives. Each Character District is part of the overall implementation of the approved policies of the Comprehensive Plan and will ensure that preservation and development occurs in the desired amount, location, and type.

Each Character District is composed of 7 parts:

1. The Vicinity Map identifies the location and size of the Character District in relation to the rest of the community.
2. The District Complete Neighborhood/Rural Table indicates whether the district currently contains the characteristics of Complete Neighborhoods and Rural Areas. It also indicates and whether those characteristics will be maintained or enhanced in the future. This serves to explain the classification of the district and identify the district's broad focus and basic issues and opportunities.
3. Existing + Future Characteristics describes in words the existing and future character for the district as a whole focusing on the elements of elements of character that should be preserved, enhanced and introduced in the future. This section provides the overall goals and vision for the district.
4. The Policy Objectives are the policies from the Common Values that are particularly relevant in this district. There are many other policies that apply to the district but these are the key objectives to be met in the District in order for the community to achieve its Vision as a whole.

3

Existing + Future Desired Characteristics

The Town Square district is the historic core of Jackson Hole and the central gathering space for residents and visitors alike. The district is home to iconic buildings and public spaces, including the Cowboy Bar, George Washington Memorial Park (the "Town Square"), and the sawtooth building profiles along the Square. The community has strongly expressed a desire to preserve the existing western character and heritage found in the buildings and public spaces in this district. The district is the center of the visitor experience in town and plays an important role in defining our community's western heritage and community character.

In the future, the district will focus on maintaining a western character by retaining or replicating the existing built environment. Building heights should not exceed two stories and buildings should be located near the street to create an attractive street front. A desired western Architectural style and approach will be consistently defined. The continuation of covered wooden boardwalks is vital to maintaining the desired western character. Parking will be provided predominantly in public lots and on street as a way to create a vibrant walkable area not dominated by the automobile.

A future goal of the district is to have visitors and residents visit the area more often and stay longer increasing the vitality of the area and supporting the local economy. To support this goal, commercial uses that create an active and engaging pedestrian experience including restaurants, bars, a variety of retail shops and commercial amusement supported by both visitors and locals will be located on the first and second floors of buildings. As the center of a Downtown Retail Shopping District, office, residential and lodging uses will be located on upper floors.

4

Policy Objectives

- 4.1.d: Maintain Jackson as the economic center of the region
- 4.2.c: Create vibrant walkable mixed use districts
- 4.2.d: Create a Downtown Retail Shopping District
- 4.2.e: Protect the image and function of Town Square
- 4.4.a: Maintain and improve public spaces
- 4.4.c: Continue traditions and community events
- 4.5.a: Identify and preserve historically significant structures and sites
- 6.2.a: Enhance tourism as the basis of the economy

5. The Neighborhood Forms are the land use patterns from the range of land use patterns that exist in the community that are appropriate in the district. They begin to identify the appropriate type, location, and intensity of development for the district.

5

Neighborhood Form

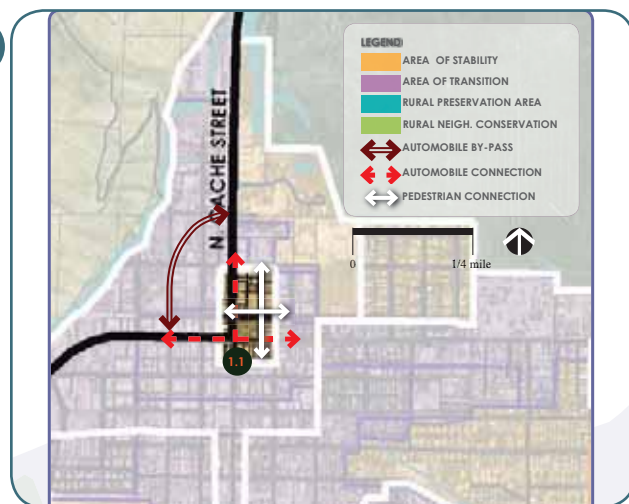

Mixed Use

Town

6. The Character Defining Features Map identifies the areas of stability, transition, preservation, and conservation within the district. Other key character defining features that are best described through mapping are also included; however the map not intended to represent the specific location or extent of these characteristics.

6

7. The Character Defining Features section of the district describes each area of stability, transition, preservation and conservation through text and photos or drawings. The focus of the description is the character priorities for that area that will allow the future character of the District, and consequently the community Vision, to be achieved.

7

Character Defining Features

1.1: Town Square

This STABLE district has a two story height limit with buildings fronting the street to create a pedestrian atmosphere. Pedestrian amenities are an important focus, with focus on automobiles secondary. The district features a western character and style.

District 12: Aspens/Pines

DEFINITION		EXISTING	FUTURE	
COMPLETE NEIGHBORHOOD	Defined Character/High Quality Design			Connect subareas
	Public Utilities			Water and sewer
	Quality Public Space			Improved access to quality public spaces
	Variety of Housing Types			Maintain housing variety
	Walkable Schools, Commercial + Recreation			Improved pedestrian connection to existing amenities
	Connection by Complete Streets			Improved safety and connectivity for all modes
RURAL	Viable Wildlife Habitat + Connectivity			Preserve riparian areas and permeability
	Natural Scenic Vistas			
	Agricultural + Undeveloped Open Space			
	Abundance of Landscape over Built Form			Maintain ratio
	Limited, Detached Single Family Res. Development			
	Minimal Nonresidential Development

Existing + Future Desired Characteristics

The Aspens/Pines complete neighborhood is characterized by a variety of housing types and nonresidential uses developed in distinct subareas. Highway 390 runs through the middle of the district connecting and separating the different subareas. To the west of Highway 390 is a master planned community with a commercial core that provides local convenience commercial and resort type recreational amenities; as well as a mix of detached single family units and clustered multifamily units occupied by the workforce, retirees, and visitors. To the east of the highway is a gradient of development intensity which ranges from nonresidential and medium density workforce housing at the south to low density workforce housing in the north. The district is adjacent to the Snake River corridor and contains riparian habitat and open spaces which serve as wildlife movement corridors.

In the future, this district will have a more cohesive character highlighted by better connectivity and increased workforce housing opportunities. Nonresidential use will be consolidated to the commercial core on the west side of the road. The highway corridor will be redesigned to be safe for all modes of travel as well as wildlife. Both sides of the highway will be connected to the commercial core by pedestrian infrastructure and the district will become better connected to the rest of the community through increased START service. Development will be designed for wildlife permeability and the riparian habitat in the district will be protected and enhanced.

Policy Objectives

- 1.1.c: Design for wildlife permeability
- 1.2.a: Buffer water bodies, wetlands, and riparian areas from development
- 3.2.b: Locate nonresidential development to complete neighborhoods
- 3.2.d: Emphasize a variety of housing types
- 3.2.e: Promote quality public spaces in complete neighborhoods
- 5.3.b: Preserve existing workforce housing stock
- 6.2.b: Support businesses located in the community
- 7.1.c: Increase the capacity for use of alternative transportation modes
- 7.2.d: Complete key Transportation Network Projects to improve connectivity
- 7.3.b: Reduce wildlife and natural and scenic resource transportation impacts

Neighborhood Form

Residential

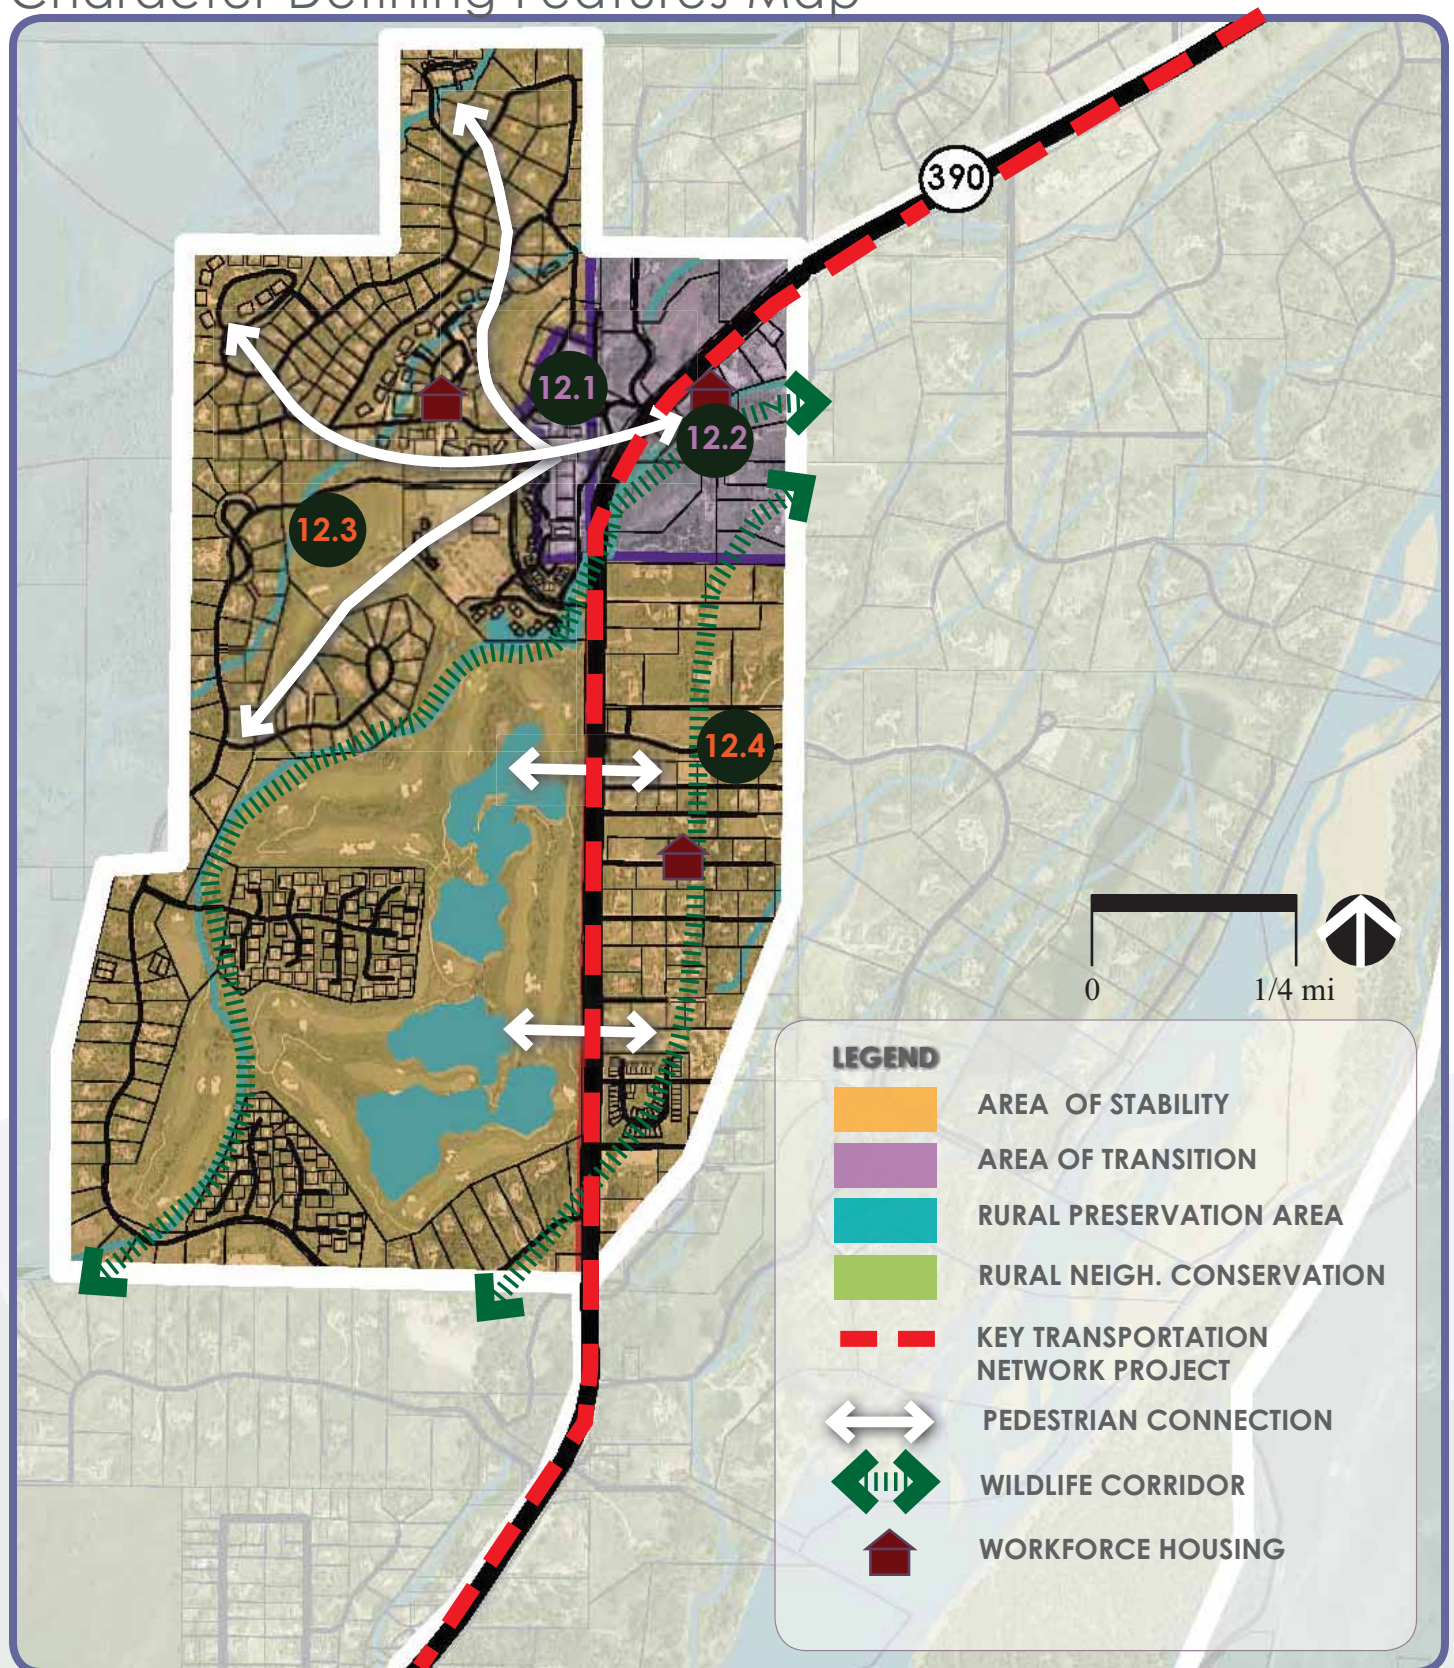

Village

Mixed Use

Character Defining Features Map

Character Defining Features

12.1: Aspens/Pines Commercial Core

This TRANSITIONAL area will redevelop to be a more vibrant, active, pedestrian, mixed use core. In the future, the Aspens/Pines commercial core will be a mixed use area that provides local and visitor commercial. The existing mix of nonresidential use in the district will be preserved as the area redevelops. Nonresidential development from other parts of the district would be better located within this area as well. Residential opportunities will be incorporated into the area without adding height to the existing two level character. As redevelopment occurs it should become more oriented toward a complete “main street” parallel to the highway that may be a continuation of the existing frontage road. It should be developed with buildings on both sides that are pedestrian oriented. In areas between the “main street” and the highway, buildings should address both frontages. Pathway and other pedestrian infrastructure will connect this area to residential areas. Parking will be consolidated off of the main street and double as a park n’ ride in conjunction with increased START service to the district.

12.2: 390 Residential Core

This TRANSITIONAL area will become defined by housing variety within walking distance of the commercial core. The future character of this area will be similar in form to the Aspens, but will be more workforce oriented with no short-term rental of units. A mix of multifamily, small lot single family, and larger single family will be organized around open spaces and public parks. Highway access points will be limited, but a network of complete streets and pathways within the area will allow for pedestrian access to the commercial core. Buildings will be sized, sited, and otherwise designed to allow wildlife movement through the area.

12.3: Aspens/Pines Residential

This STABLE area will remain a mix of housing types organized around open space. The area will continue to be characterized by retiree, workforce, and visitor occupation, however a more year-round, workforce character will be encouraged. The existing wildlife permeability that comes from clustered development around open space will be preserved. The Aspens common area will be developed into a higher quality public space with better connection to the commercial core. Throughout the area, year-round pedestrian amenities will reduce the need for vehicle travel within the district.

12.4: 390 Residential South

This is a STABLE area of one acre lots with small detached single family homes. Redevelopment will be designed to be more consistent with this character. This area is, and should remain characterized by workforce housing occupied by long-term residents. Enhancements to the district will include increased wildlife permeability through clustering redevelopment, eliminating or reducing fencing, protecting and enhancing riparian habitat and other measures that remove barriers to wildlife movement. Enhancements will also be made to the connectivity within the area and to other areas of the district. Highway access will be consolidated to the extent possible minimizing congestion on the highway and enhancing the sense of community within the area. Year-round pedestrian connections will be established to the pathway across the highway and ultimately the commercial core.
