

# Illustration of Our Vision

## Why Illustrate Our Vision?

Realizing our vision requires proactively planning for what we want - rural open spaces and high quality complete neighborhoods - by identifying where we want them and what we want them to look like. Our Vision is to direct development toward suitable areas in order to preserve and protect the ecosystem; and design development to enhance our quality of life. The Illustration of Our Vision defines the type of preservation or development in each area of the community that will allow us to realize our Vision. In areas suitable for development, the Illustration of Our Vision describes how we will protect the character we love while ensuring that development contributes to achieving the goals of the Comprehensive Plan. In all other areas, the Illustration of Our Vision describes how we will preserve and enhance wildlife habitat, wildlife connectivity, scenic vistas, and open space.

Defining desired character for all areas of the community provides predictability in planning and development, which has been absent in the past. Incremental, site-specific determinations of the applicable policies that are emotionally, politically and legally tied to a specific development plan are no longer the community's growth management principle. The Illustration of Our Vision bridges the gap between our communitywide Vision and the development of an individual site so that all community members can understand how an individual preservation or development project should contribute to the achievement of our Vision. The Illustration of Our Vision will inform land development regulations that ensure no policy of this Plan is forgotten and that all policies are implemented within the proper context.

The Illustration of Our Vision also provides accountability and measurability. By defining the existing and desired character of each area of the community, we can quantify our progress toward achieving the rural open spaces and high quality complete neighborhoods we desire. With this data we can determine what strategies work in which locations and improve our understanding of why certain strategies are more or less appropriate in certain situations. The Illustration of Our Vision will enable the rigorous analysis needed to continually adapt our implementation strategies to ensure that preservation and development occur in the desired amount, location and type.

# How is the Vision Illustrated?

The Illustration of Our Vision depicts the policies of the community's three Common Values on the ground through four levels of character classification.

At the highest level, the private lands of the community are divided into Character Districts – areas with common natural, visual, cultural and physical attributes, shared values and social interaction. Character District boundaries are based on a layering of the best available quantitative and qualitative data for each of the three Common Values (Ecosystem Stewardship, Managed Growth, Community Character) in order to identify areas that share similar characteristics.

While our community's 15 Character Districts share common values, each has a unique identity. Based upon the presence or absence of specific characteristics, each Character District is classified as either a Rural Area focused on ecosystem stewardship or a Complete Neighborhood focused on protecting and enhancing great neighborhoods. The map on pages IV-4 and IV-5 shows the Character District boundaries, specific Complete Neighborhood and Rural Area characteristics and the classification of each district.

At the next level, each Character District is divided into subareas. Each subarea is categorized as Stable, Transitional, Preservation or Conservation based upon the existing character of the subarea and the desired future character for the entire district. Stable and Transitional subareas are the most suitable locations for people to live, work and play. Subareas focused on ecosystem stewardship are designated as Preservation or Conservation. Because our Vision is to preserve and protect the area's ecosystem in order to ensure a healthy environment, community and economy for current and future generations, the community has committed to locating less than 40% of future development in the Preservation and Conservation subareas that make up roughly 93% of the private land in the community. At least 60% of future development will be directed into Stable and Transitional subareas, which make up only about 7% of the private land in the community. The map on pages IV-6 and IV-7 shows the subareas and defines the subarea classifications.

Finally, for each subarea, Character Defining Features are described to ensure the desired character is illustrated. The Character Defining Features provide the greatest level of site specific detail; however the characteristics are still conceptual and will inform specific regulations, incentives and programs. The characteristics valued by the community within a subarea are mapped, described and illustrated. On pages IV-8 and IV-9 is a legend that describes the symbols and graphics used on the Character Defining Features maps. An appropriate Neighborhood Form(s) is also identified for each subarea. A Neighborhood Form identifies the general pattern and intensity of development that meets the desired character. On pages IV-10 and IV-11 is a transect that depicts the continuum of Neighborhood Forms that make up our community and shows the relationship between the various patterns and intensities.

# Complete Neighborhoods + Rural Areas

Complete neighborhoods provide:

Defined character and high-quality design

Public utilities (water, sewer, and storm sewer)

Quality public spaces

A variety of housing types

Schools, childcare, commercial, recreation, and other amenities within walking distance (1/4 to 1/2 mile) of residences

Connection by complete streets that are safe for all modes of travel

Viable wildlife habitat and connections between wildlife habitat

Natural scenic vistas

Agricultural and undeveloped open space

Abundance of landscape over built form

Limited, detached single family residential development

Minimal additional nonresidential development

Rural areas provide:

Character Districts

# Areas of Stability, Transition, Preservation + Conservation

## Complete Neighborhood Areas of Stability

- Subareas in which no change to the existing character is necessary
- Development will be infill that maintains the existing identity or vitality
- The subarea may benefit from strategic infill or development of non-existing Complete Neighborhood amenities

## Complete Neighborhood Areas of Transition

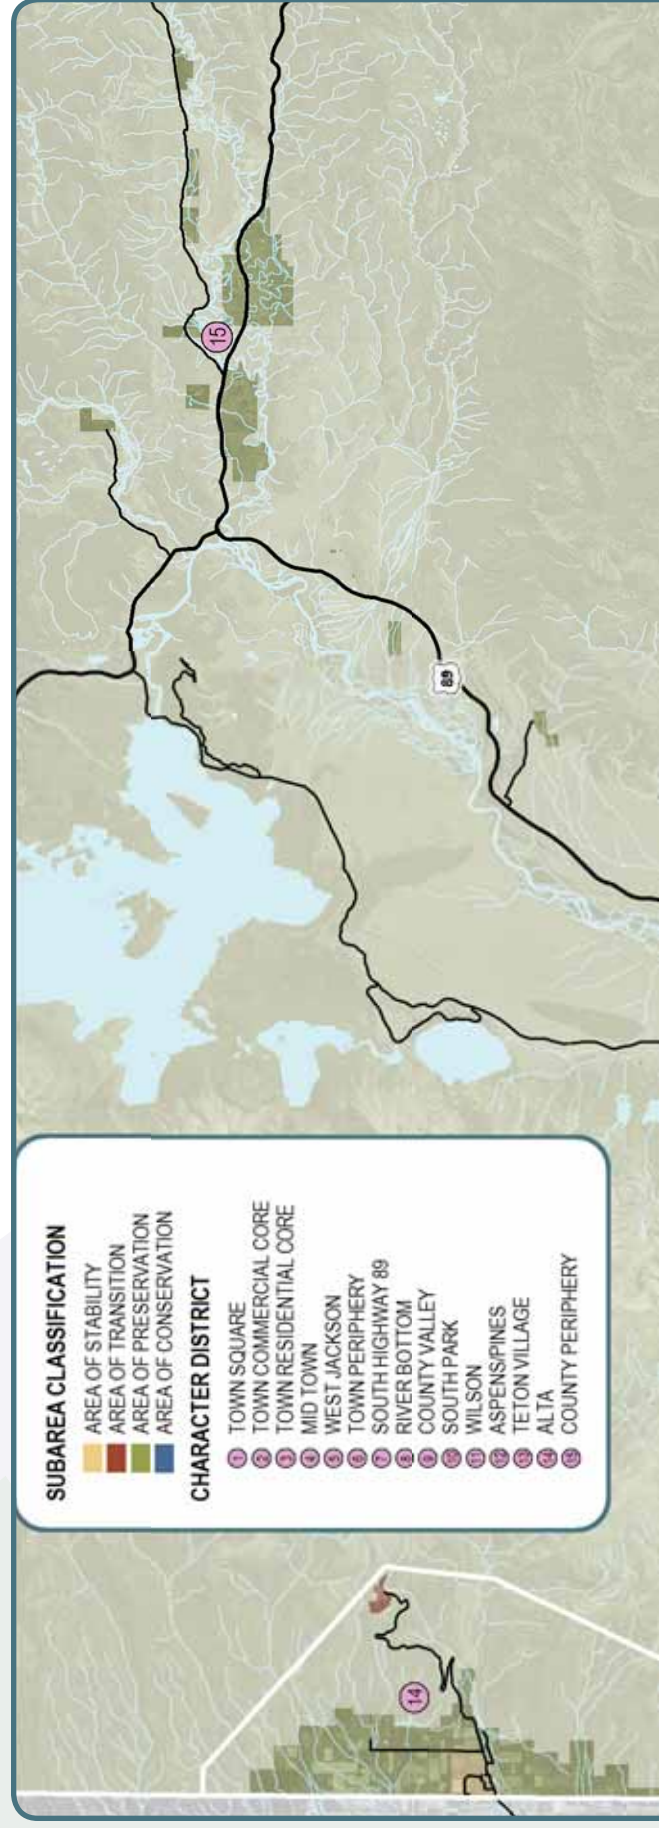

- Subareas where most of the community would agree that development/redevelopment or a change in character would be beneficial
- Subareas that would benefit from reinvestment and revitalization
- Goals for development include improving access to jobs, housing and services and reducing reliance on single-occupancy trips

## Rural Areas of Preservation

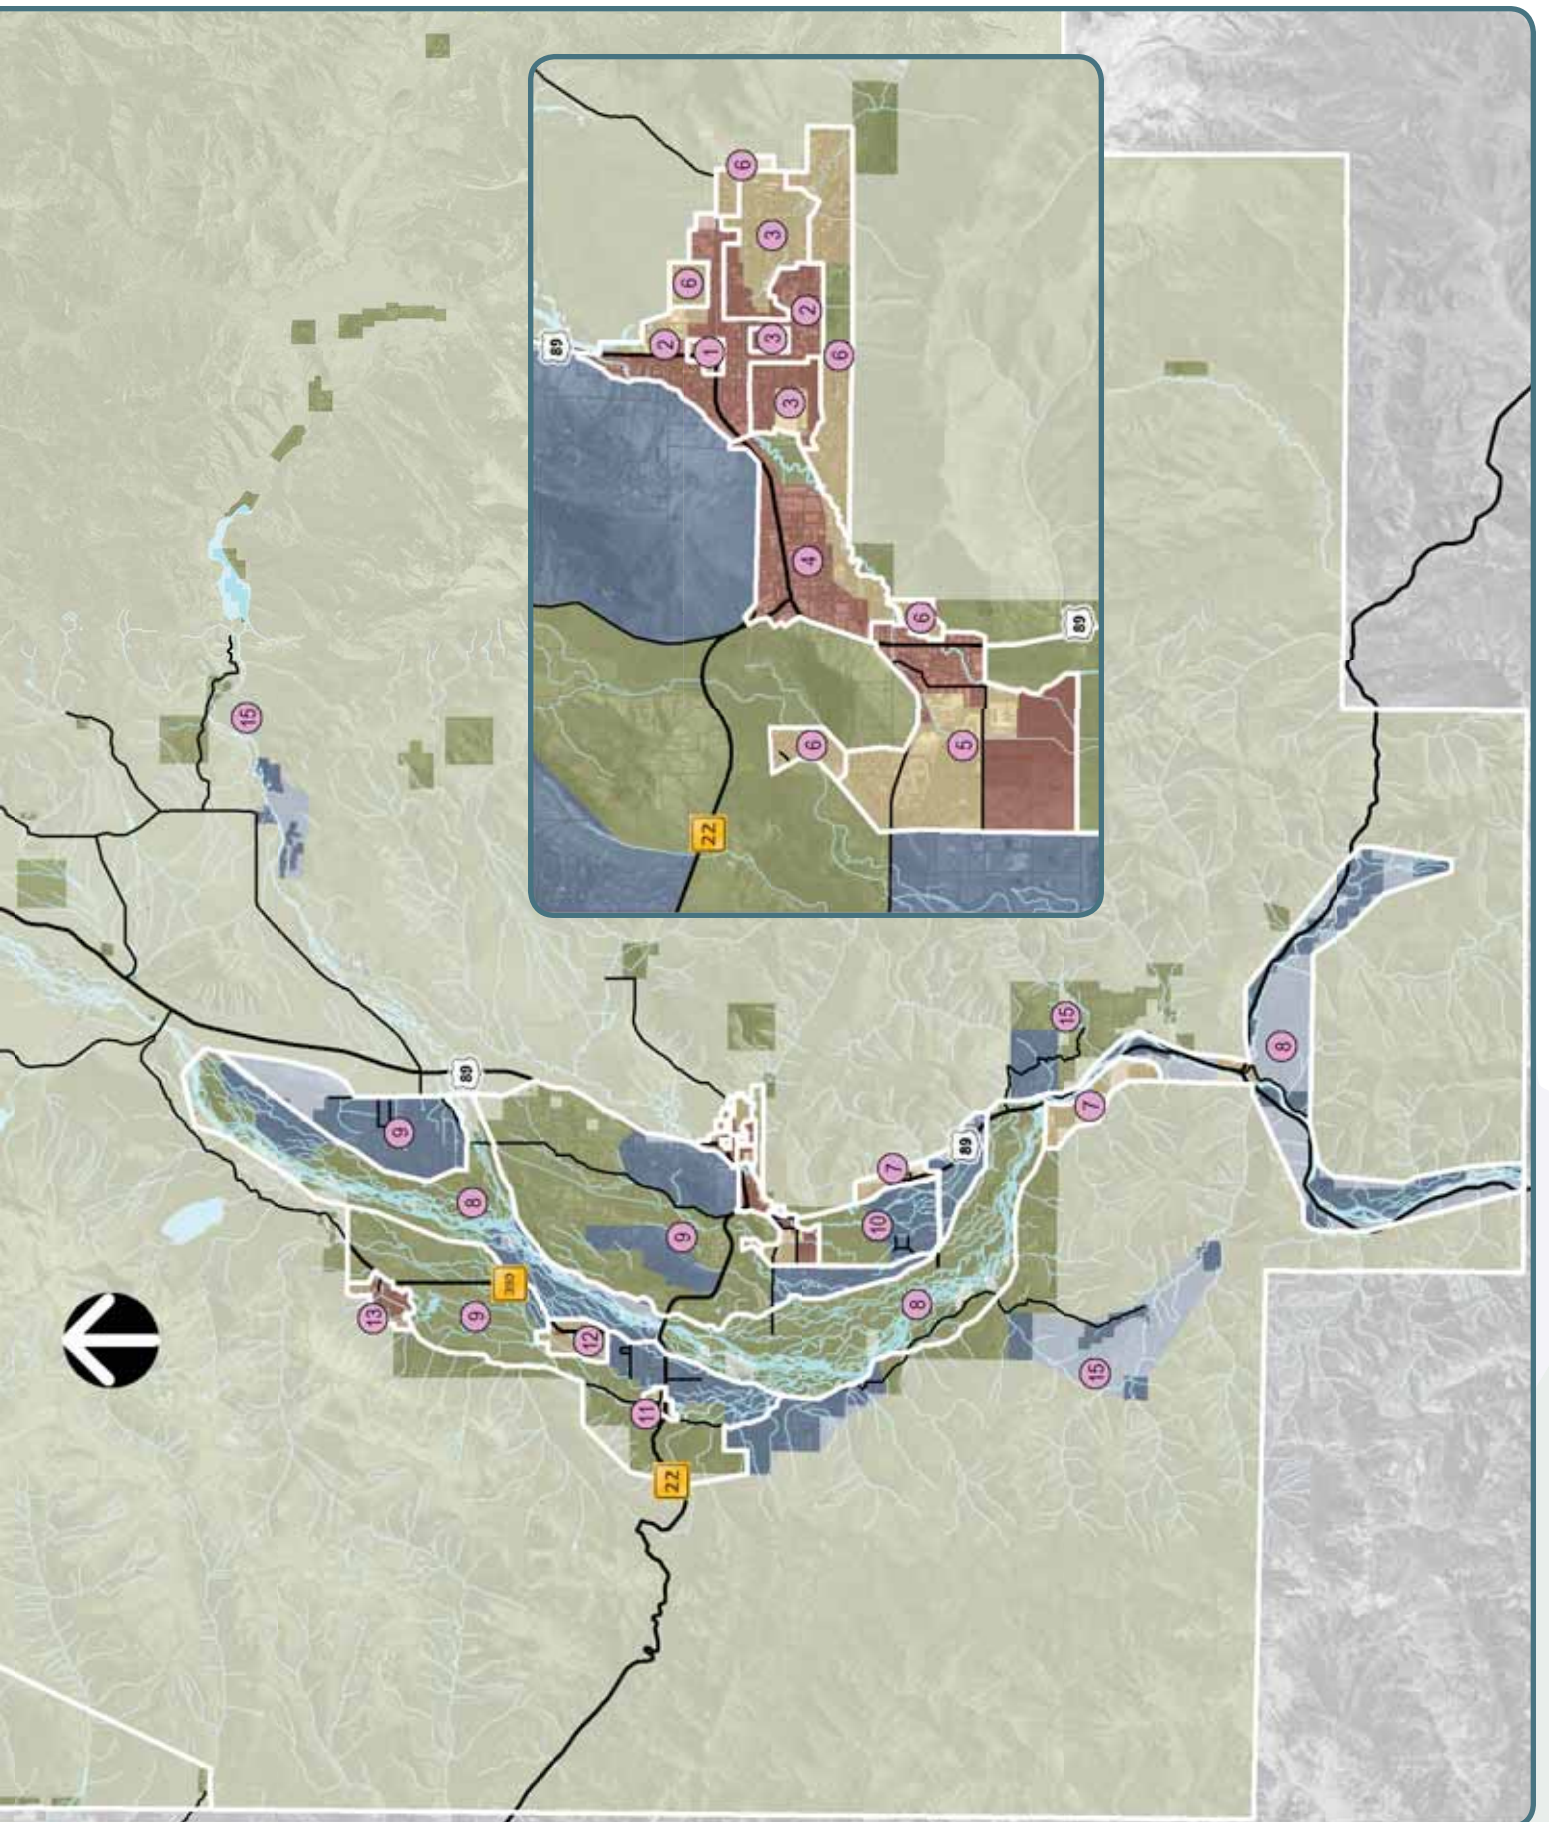

- Subareas in which no change to the existing undeveloped character of the scenic resources and wildlife habitat is necessary
- Additional amenities and infrastructure are inappropriate
- May benefit from some clustered residential development that improves the overall preservation of open space

## Rural Neighborhoods with Conservation Opportunities

- Areas of existing development and platted neighborhoods with high wildlife values, where development/redevelopment should focus on improved conservation
- Areas that benefit from an increase in open space, scenic resources, and habitat enhancement
- Goals include balancing existing developed wildlife with improved wildlife permeability and scenic enhancements.

# Character Defining Features - Map Symbols

The Character Defining Features Maps depict the characteristics that define each district and subarea. Below is a list of symbols and map attributes that are used on the maps. Characteristics that are locational are shown on the map using color symbols or map attributes. Other characteristics, depicted using black symbols, apply generally to a subarea, but are not location specific. All mapped features are illustrative of the character of an area and do not imply regulatory boundaries or specific locations.

## *Common Value 1 – Ecosystem Stewardship*

Wildlife Permeability: Design for wildlife permeability should be a characteristic of the subarea.

Agriculture: Agricultural use should be characteristic of the subarea.

Wildlife Highway Crossing: Wildlife-vehicle collision mitigation emphasis site as identified by the Western Transportation Institute and Montana State University College of Engineering in 2012.

Crucial Habitat: Bald eagle, trumpeter swan, mule deer, elk, and/or moose crucial winter habitat; mule deer and/or elk migration corridor; and/or bald eagle and trumpeter swan nesting area; and/or cutthroat trout spawning area as identified by the Conservation Research Center of Teton Science Schools in 2008.

Scenic Corridor/Vista: Scenic highway corridors and vistas as identified on 1994 Community Issues Maps.

## *Common Value 2 – Growth Management*

Gateway: A gateway into the community.

Public Parking: Existing parking provided by the Town of Jackson.

Road Corridor Enhancement: A roadway corridor that will be characterized in the future by enhanced pedestrian and commercial vitality.

Creek Corridor Enhancement: A creek within a complete neighborhood that will be characterized in the future by enhanced recreational opportunities and ecological value.

---

### *Common Value 3 – Community Character*

Workforce Housing: Housing occupied by the workforce should be a characteristic of the subarea.

START Service: START service should be a characteristic of the subarea.

Local Convenience Commercial: Local convenience commercial should be located within the subarea.

Industrial: Light industrial and heavy retail use should occur in the subarea.

Parks and Recreation: Existing parks and recreation facilities.

School: Existing schools.

Key Transportation Network Project: Transportation network projects identified in Policy 7.2.d.

Existing/Proposed Pathways: Existing and proposed pathways identified in the Pathways Master Plan (2007).

Improved Interconnectivity: An area that will be characterized in the future by increased interconnectivity.

# Character Defining Features - Neighborhood Form Continuum

A Neighborhood Form identifies the general pattern and intensity of development representative of a certain character. One or more neighborhood forms are associated with each subarea. Below is a transect that depicts the continuum of Neighborhood Forms that make up our community and shows the relationship between the various patterns and intensities that define our character.

	Preservation	Agriculture	Clustering
Acres	n/a	70+	35+
Height	n/a	n/a	2 story
Use	Preservation	Residential, Conservation	Residential, Conservation
Special Considerations	Preserved open space, wildlife habitat	Agricultural exemptions + incentives, scale of historic agricultural compounds	Improved wildlife habitat, open space and scenic protection with respect for private property rights, integrated transportation planning, scale of historic agricultural compounds

Habitat/Scenic	Conservation	Residential	Village	Village Center	Town	Resort/Civic
+/- 35	1-5	± 1	n/a	n/a	n/a	n/a
2 story	2 story	2 story	2 story	2-3 story	2-3 story	n/a
Residential, Conservation	Residential	Residential	Residential, Local Convenience Commercial, Civic	Residential, Commercial, Industrial, Civic	Residential, Commercial, Civic	Resort, Civic
Design for wildlife and/or scenery, scale of historic agricultural compounds	Design for wildlife and/or scenery, scale of historic agricultural compounds	Design for wildlife and/or scenery, scale of historic agricultural compounds	Variety of housing types, complete streets, workforce housing	Mixed use, pedestrian oriented, complete streets, workforce housing	Pedestrian oriented, public spaces, complete streets, workforce housing, employment center	Master Planned, more intense development, public, semi-public facilities

# What Does the Illustration of the Vision Address?

Our community's Vision is illustrated in 15 Character Districts. Each Character District has unique issues, opportunities and objectives. Each Character District guides the overall implementation of the Comprehensive Plan and will ensure that preservation and development occur in the desired amount, location and type throughout the community.

Each Character District is composed of 6 parts:

1. The Vicinity Map identifies the district boundaries and the size of the district in relation to the entire community. It also depicts the boundaries of the district subareas and their Stable, Transitional, Preservation, or Conservation classification.
2. The Character Defining Features Map depicts the characteristics that define each district and subarea. Characteristics best described through mapping are shown on the map, while other characteristics are shown symbolically. Mapped features are illustrative of the character of an area and do not imply regulatory boundaries or specific locations of infrastructure. A complete list symbols used on the maps can be found on pages IV-8 and IV-9.
3. The Complete Neighborhood/Rural Area Table indicates whether the district currently has the characteristics of a Complete Neighborhoods or a Rural Area. It also indicates whether those characteristics will be maintained or enhanced in the future. This table serves to explain the classification of the district and identify the district's broad focus, basic issues and opportunities.

4. Existing + Future Characteristics describe in words the existing and future character of the district, focusing on the elements of character that should be preserved or enhanced. This section provides the overall goals and vision for the district.

#### 4 Existing + Future Desired Characteristics

Wilson is a small complete neighborhood with a broad reach. While relatively few residents live in the district, many more outside the district rely on it for services and consider it their home. In addition, it is the western gateway into the community for those travelling over Teton Pass. Wilson is characterized by quality social, economic, and natural amenities. It has parks, a community center, an elementary school, childcare, a general store, a hardware store, offices, medical services, restaurants, and bars all within a short distance. Fish Creek and the riparian areas of Wilson provide crucial wildlife habitat and wildlife corridors. Surrounding the district is permanently conserved agricultural open space.

Protecting Wilson's existing character while enhancing the district and meeting the community's growth management goals is the primary issue in Wilson. Wilson's future character should be consistent with the character which endears it to so many community members today. The district's residential subareas should maintain their character and Wilson should continue to provide locally-oriented commercial and neighborhood services that limit the need for trips from the west bank into Town. The provided services should be sufficient to support the residents of the district and those otherwise passing through the district without relying on additional development potential or attracting trips from elsewhere in the community. Pedestrian connectivity within the district should be enhanced by improved pedestrian access from the residential subareas into the commercial core, a more pedestrian-oriented design of the commercial core, and safe and convenient pedestrian crossings of Highway 22 in the commercial core and at the school. In addition, START should become a more visible and viable option for residents of Wilson and surrounding areas. Wildlife should continue to inhabit the district through the periphery and riparian corridors of Wilson.

5. The Policy Objectives are policies from the Common Value chapters of the Comprehensive Plan that are particularly relevant and should be implemented in the district. There may be other policies that apply to the district, but these are the key objectives to be met in the district in order for the community to achieve our overall vision.

#### 5 Policy Objectives

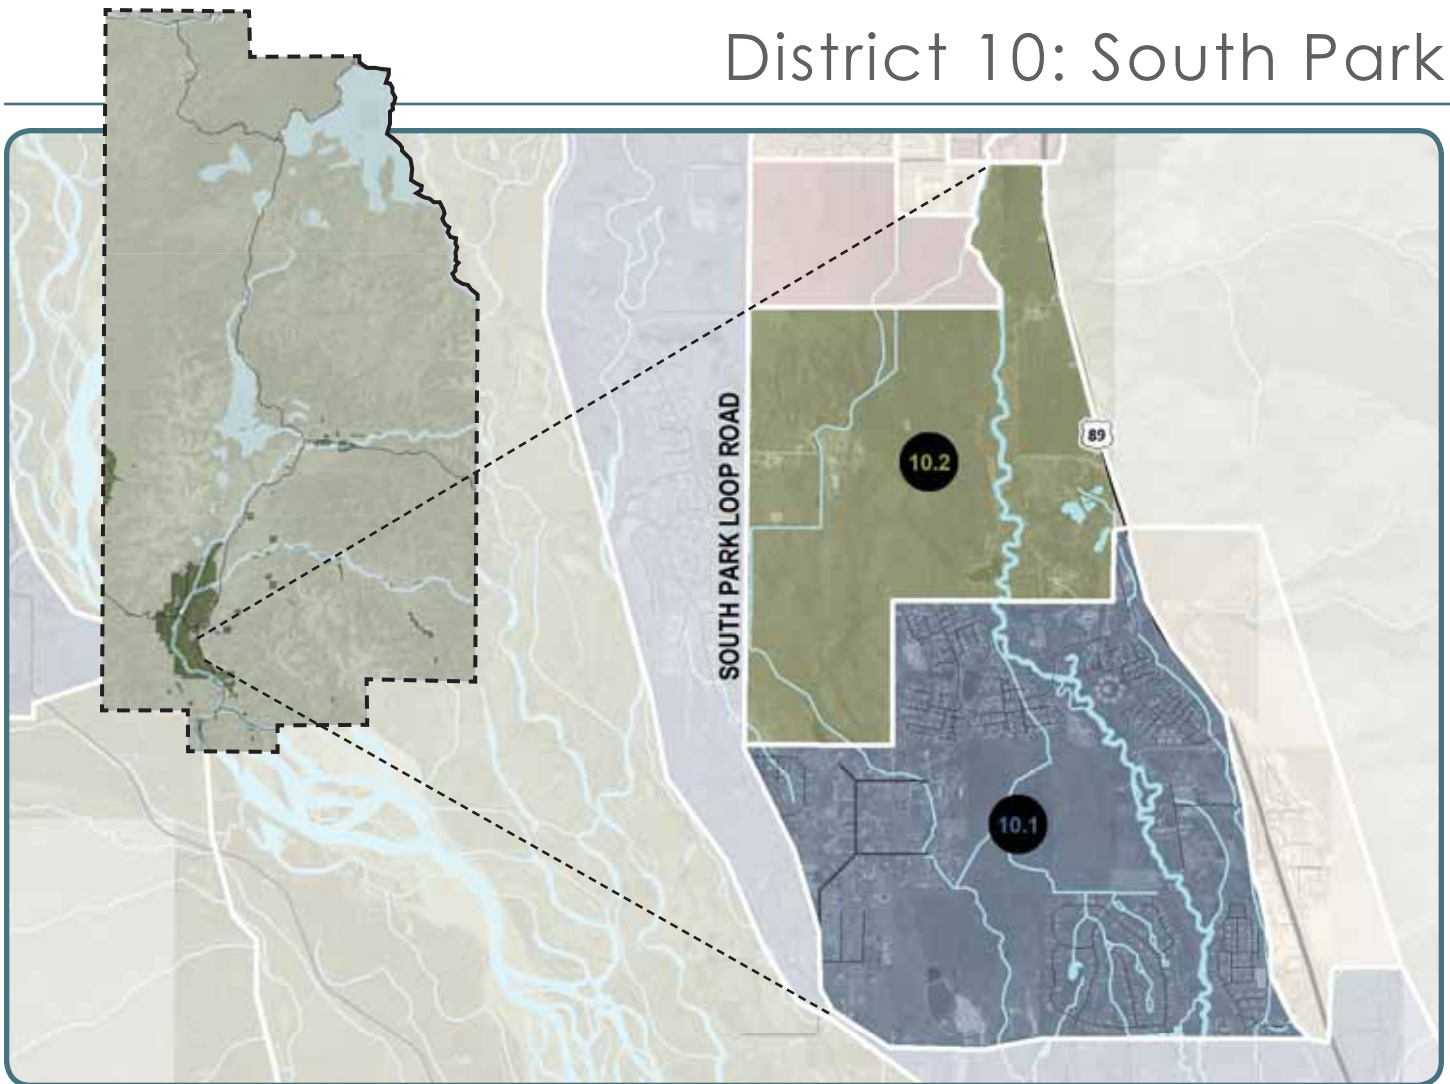

<i>Common Value 1: Ecosystem Stewardship</i>	1.1.c: Design for wildlife permeability 1.2.a: Buffer water bodies, wetlands, and riparian areas from development
<i>Common Value 2: Growth Management</i>	3.2.b: Locate nonresidential development to Complete Neighborhood 3.2.d: Emphasize a variety of housing types 3.2.f: Enhance natural features in the built environment
<i>Common Value 3: Community Character</i>	5.3.b: Preserve existing workforce housing stock 6.2.c: Encourage local entrepreneurial opportunities 7.1.c: Increase the capacity for use of alternative transportation modes

6. The Character Defining Features describe each subarea through text, neighborhood forms, and photos and/or drawings. The focus of the description is the character priorities that will allow for the desired character of the district, and consequently the community Vision, to be achieved. The neighborhood form(s) depict the general pattern and intensity of development that meets the desired character; while the illustrations and/or photos provide a more detailed illustration of the desired built form. The entire continuum of built forms can be found on pages IV-8 and IV-9.

#### 6

# District 10: South Park

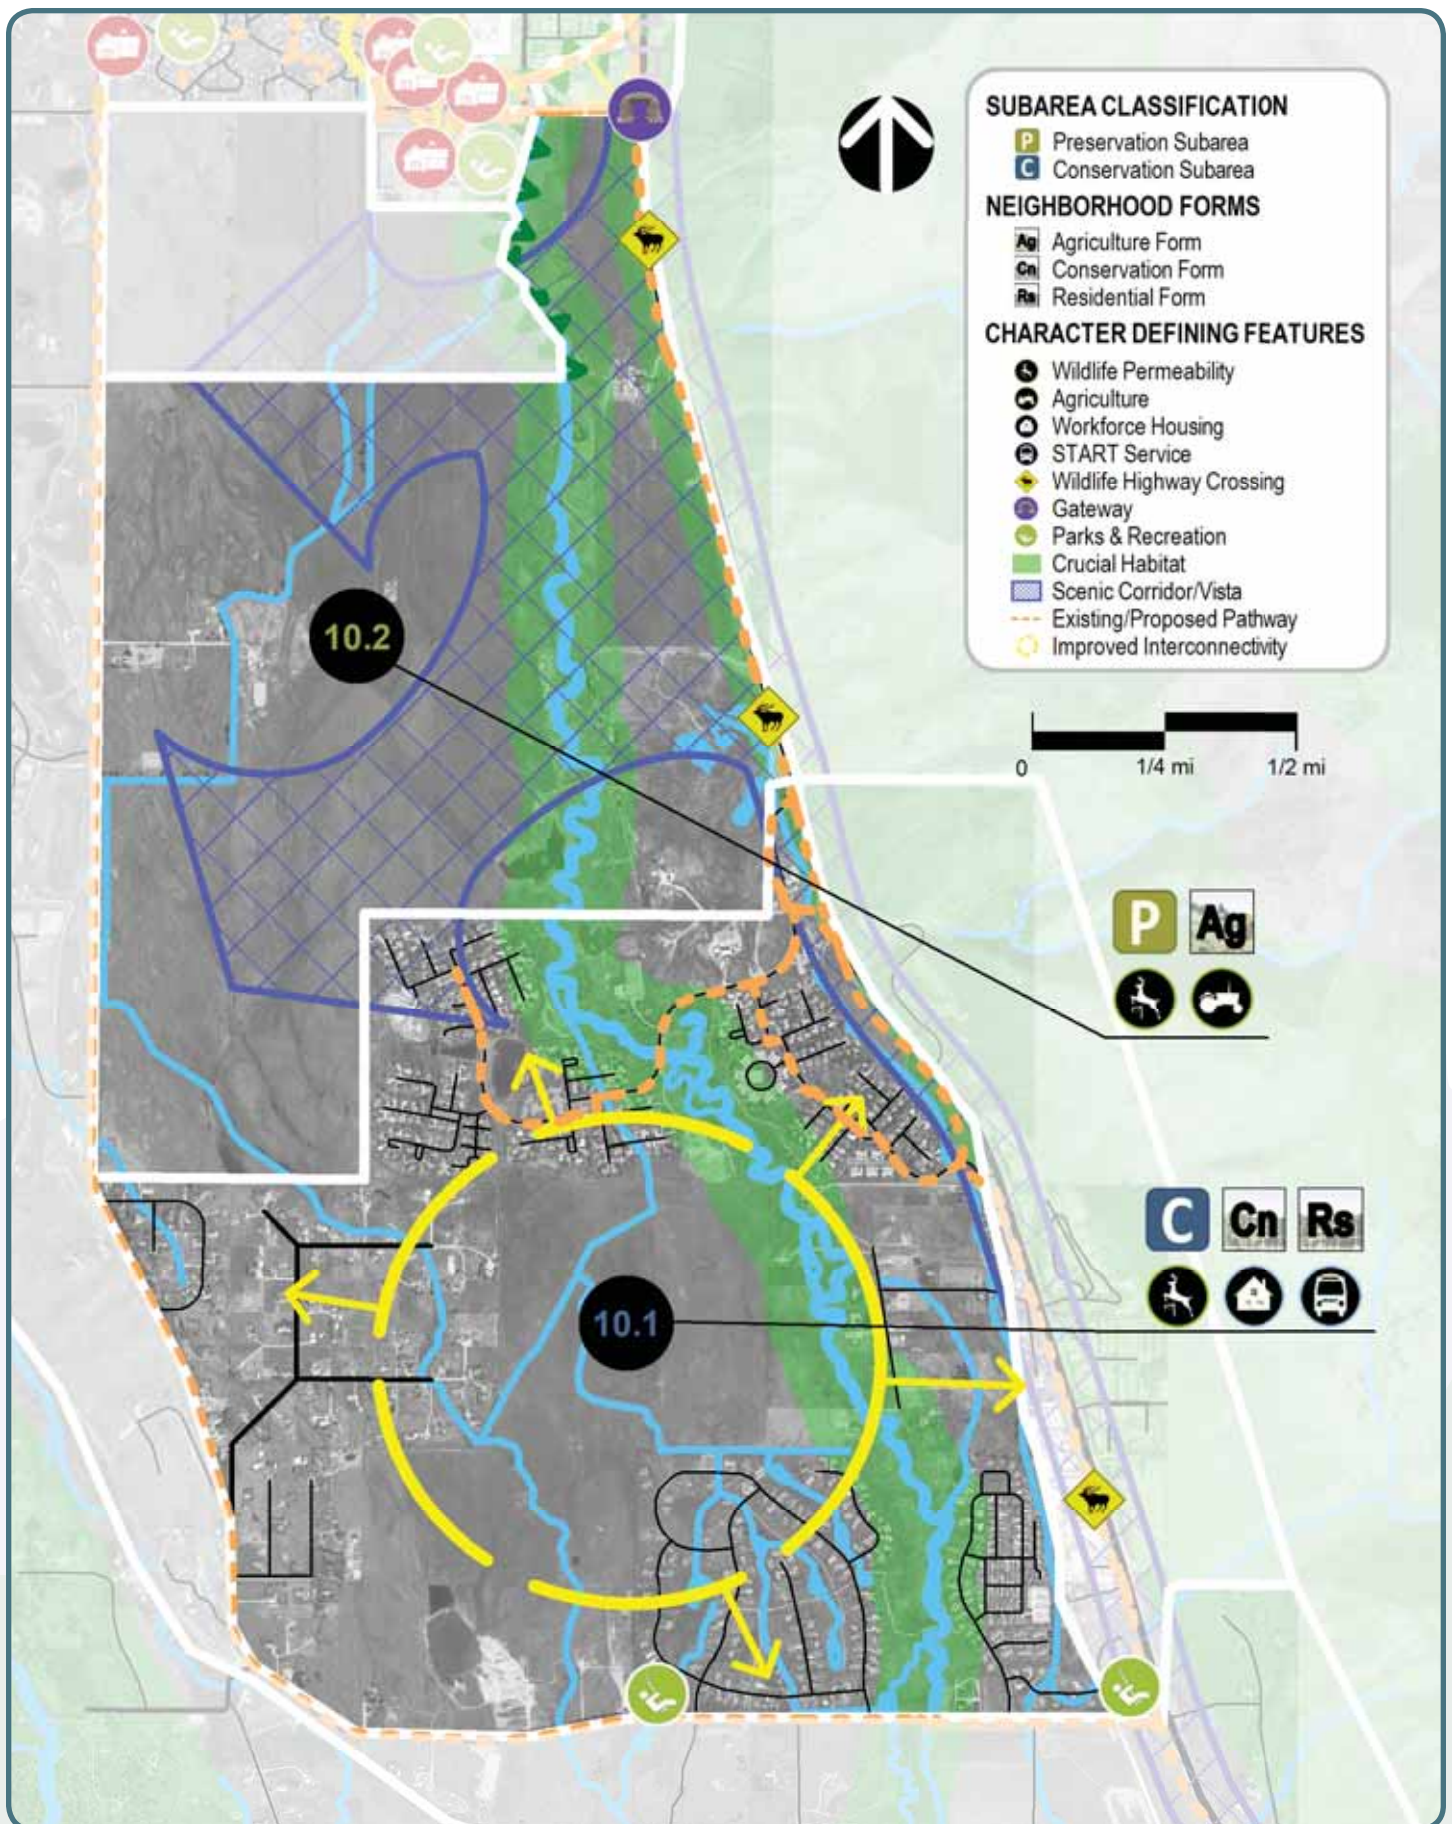

## Complete Neighborhood + Rural Area Chart

DEFINITION		EXST.	FUTURE	
COMPLETE NEIGHBORHOOD	Defined Character/High Quality Design			
	Public Utilities			Sewer and some water
	Quality Public Space			Neighborhood parks, pathways
	Variety of Housing Types			
	Walkable Schools, Commercial + Recreation			Potentially add a school and increase connectivity
	Connection by Complete Streets			
RURAL	Viable Wildlife Habitat + Connectivity			Protect Flat Creek and open space
	Natural Scenic Vistas			Preserve agricultural foreground gateway
	Agricultural + Undeveloped Open Space			Conserve agricultural open space
	Abundance of Landscape over Built Form			Improve clustering
	Limited, Detached, Single Family Res. Development			Predominately detached single family
	Minimal Nonresidential Development			Maintain existing

Legend: Generally Present; Partially Present; Generally absent

## Existing + Future Desired Characteristics

The South Park District is, and should continue to be, the agricultural southern gateway into Jackson. The existing agricultural open space that defines the character of the district provides a scenic foreground for Teton views, wildlife habitat connectivity, reference to our community's heritage and stewardship ethic, and a quiet rural setting for residents. The most important habitat in the district is the Flat Creek riparian corridor; however, the intensity of wildlife vehicle collisions on South Highway 89 shows the importance of the district's open space for wildlife movement in all directions. Existing development is predominately residential and largely occupied by the workforce. It is clustered to the southeastern portion of the district, with the densest areas well screened from the highway by topography, vegetation, and other development. The existing developments are well served individually by pathways, parks, and infrastructure, but lack interconnection and require highway travel to access convenience commercial and other amenities.

The district should maintain the character that it has today. Agricultural open spaces should be preserved, and development should be directed into a complete neighborhood wherever possible. Development that does occur should be clustered adjacent to existing development. Wildlife habitat connectivity and permeability should be enhanced through existing development and across Highway 89. The Flat Creek corridor should be preserved and enhanced with a focus on wildlife habitat and movement. Provision of START service and possibly a school will be encouraged to better serve the workforce living in and around this district. Future character should also include improved interconnectivity and internal connection to the commercial amenities along South Highway 89.

## Policy Objectives

<i>Common Value 1: Ecosystem Stewardship</i>	1.1.c: Design for wildlife permeability
	1.2.a: Buffer water bodies, wetlands, and riparian areas from development
	1.3.b: Maintain expansive hillside and foreground vistas
	1.4.b: Conserve agricultural lands and agriculture
	1.4.c: Encourage rural development to include quality open space
<i>Common Value 2: Growth Management</i>	3.1.a: Reduce development potential in the Rural County
	3.1.b: Direct development toward suitable areas for complete neighborhoods
	3.1.c: Maintain rural character outside of complete neighborhoods
<i>Common Value 3: Community Character</i>	5.3.b: Preserve existing workforce housing stock
	7.3.a: Develop a land use pattern based on transportation connectivity
	7.3.b: Reduce wildlife and natural and scenic resource transportation impacts

# Character Defining Features

## 10.1: Southern South Park

This CONSERVATION subarea will continue to be defined by clustered housing including workforce housing that allows for wildlife movement. Preservation and enhancement of the wildlife habitat along the Flat Creek corridor and through the existing developed areas is essential for wildlife movement; it is this wildlife use of the Flat Creek corridor that should continue to define its character. The open space interior to this subarea is a defining feature and should be preserved to the extent possible through agriculture uses, directing development potential into a complete neighborhood, or other methods. Subdivision and new development is not desired, though private property rights will be respected and the resident workforce character of this subarea should be preserved to the extent possible. Any development of the existing open spaces should be clustered adjacent to existing development. Wildlife movement through this subarea should be further enhanced through redevelopment, and efforts to reduce density without decreasing workforce housing opportunities or increasing building size will be encouraged. In the future, residents should be able to travel between existing subdivisions and access nonresidential amenities on the highway without using the highway or South Park Loop Road. In addition, this subarea should be regularly served by START. When the School District needs additional capacity, southern South Park is an appropriate place for a new school to serve the existing population that lives south of Town.

Conservation

Residential

## 10.2: Central South Park

This PRESERVATION subarea is defined by agricultural open space. The most important of these open spaces is the area between Flat Creek and the highway. This area not only provides the scenic gateway into Town, but also preserves an open area for a wildlife crossing of the highway that would allow for movement of wildlife throughout the district to crucial habitat nearby. Continued agricultural use of the subarea will maintain the open space that defines the district and is the ideal use of the subarea. Agriculture will be encouraged through regulatory exemptions and allowances. Accessory uses that do not detract from the agricultural character of the subarea but facilitate the continued viability of agriculture may be appropriate. Development potential should be directed into complete neighborhoods wherever possible, while respecting private property rights. Development that does occur should be clustered near existing development and be designed for wildlife permeability and preservation of scenic, agricultural foregrounds. The scale of development should be of a rural character, consistent with the historic agricultural compounds and neighborhoods of the community.

Agriculture
